***Priority***

1. Applicant is reminded that in order for a patent issuing on the instant application to obtain the benefit of priority based on priority papers filed in parent Application No. 09/584,370 under 35 U.S.C. 119(a)-(d) or (f), a claim for such foreign priority must be timely made in this application. To satisfy the requirement of 37 CFR 1.55(a)(2) for a certified copy of the foreign application, applicant may simply identify the application containing the certified copy.

***Specification***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Double Patenting***

3. Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,643,095. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims require a first and second layer; a first conductive layer; a thin coil; an auxiliary layer and an insulating layer. Also, the second conductive layer is not unlike the patented lead layer because both the lead layer and the second conductive layer touches the second surface, which is opposite the first surface, of the insulating layer.
